£40/MONTH

- Everything in the Essential Plan plus an annual boiler service after the first year.

TCs apply. More information at: smartelectricboiler.co.uk/boilercareplans/

Why Go Electric with ECBC?

At ECBC, we design electric boilers for the modern UK home—sleek on the wall, powerful under the hood, and free from the constraints of gas. No flues, no fumes, no fuss.

- ✓ 99% point-of-use efficiency
- ✓ Simple to install and easy to live with
- ✓ Smart design, made in Europe
- ✓ Backed by UK-based support

Did you know?

A 12kW electric boiler performs like a 25–30kW gas boiler—thanks to 99% efficiency and zero flue loss.

A perfect match for off-grid, low-carbon and retrofit projects.

Do I have to service my electric boiler?

Servicing isn't just for gas boilers.

While not legally required, our electric boilers require a service every two years—as per manufacturer instructions—to keep your warranty valid. It's not just a formality. It's how we keep your system working at its best:

- ✓ Protects your warranty and investment
- ✓ Maintains water quality and performance
- ✓ Identifies early signs of limescale or wear
- ✓ Verifies electrical and smart components
- ✓ Confirms safety checks are up to date

A simple check-up, every two years. Maximum peace of mind.

A well-looked-after boiler runs better, lasts longer, and stays covered.
