

ZeroCal⁺ PRO

NEW DESIGN
BEST PRODUCT FOR BOILERS

ANTI-LIMESCALE DOSAGE DISPENSER SYSTEM

ULTRA COMPACT ANTI-LIMESCALE DOSAGE DISPENSER WITH LIQUID REFILL WITH MINIMUM SPACE REQUIREMENTS

ZEROCAL+ PRO is an anti-scale dosage dispenser system for boilers, water heaters, washing machines and dishwashers that use the proven immersion pump technology which, unlike other types on the market, is able to guarantee perfect functioning even after a prolonged absence of the anti-scale liquid.

The ultra-compact dimensions, ergonomic shape and orientable connections make installation quick and easy on both horizontal and elbow pipes.

For those who prefer brass, the traditional connections are joined by the new Dima 1/2" brass and Dima 3/4" brass connections.

To refill the anti-limescale product, it is not necessary to turn off the water; simply unscrew the tank, pour in **ZEROCAL+ DOSE** and screw the tank back on.
